課題:以戲劇教授初中英語

內容: The workshop focuses on using drama to enhance English teaching, showing how it can transform language learning by making it engaging and effective. We clarify the difference between Drama Education and Drama in Education, focusing on the latter to improve English skills. Through role-playing and dramatization, students enhance their reading, writing, listening, and speaking abilities. Learn how to convert texts into scripts, enabling students to better comprehend stories and grammar in real-life contexts. This method boosts imagination and comprehension while making learning fun and fulfilling. It provides an opportunity to enrich teachers' teaching strategies.
